INDEX

Introduction	2
Fertilizing Sugarbeet	3
Row Widths - Plant Populations	8
Seeds – Seeding (Seed Specification Tables)	9
Crop Protection Chemicals	
Weed Control	21
Insect Control	54
Disease Control	75
Crop Records	86
Telephone Directory	90
Poison Control Centers and 2013 Calendar	Back Cover

INTRODUCTION

"Plan For Profitable Sugarbeet Production"

This production guide will provide useful information to assist you in making timely management decisions. However, it does not give extensive details on any subject discussed. More detailed and complete discussions of weed control, soil fertility, insect and disease control, and most other aspects of sugarbeet production in Minnesota and North Dakota are presented in past issues of the Sugarbeet Research and Extension Reports and are also available at the web site (<http://www.sbreb.org>).

The pesticide use suggestions in this guide are based on Federal label clearances and on research information from the North Dakota and Minnesota Agricultural Experiment Stations. All pesticide use suggestions are based on the assumption that all chemicals will continue to have a registered label with the Environmental Protection Agency.

The publishers do not assume any responsibility, make any guarantees, or offer any warranties with regard to the results obtained from use of the data appearing in this guide.
